

Floriani...

The Name That Means Beautiful Embroidery!

No matter what project you're doing - apparel, crafts, lace, standalone embroidered pieces, delicate fabrics, quilts, or even bowls and picture frames - Floriani has the perfect stabilizer to ensure your hand-made creation turns out beautifully. Keep this handy guide as a reference to use whenever you are unsure which Floriani Stabilizer will best suit the job.

You can see the full line of Floriani Embroidery stabilizers as well as gain access to free projects, tips, and other helpful information by going to www.rnkdistributing.com

Hard To Hoop Items/High Pile Fabrics

Heat 'N' Gone Topping Stabilizer®

Use this clear, 100% heat removable film as a topping or stabilizer on all fabrics that can withstand an iron temperature of 260° - 300° F (120°-140° C). Great when you need instant stabilizer removal or when your fabric cannot withstand moisture.

Perfect Stick Tearaway®

Enjoy quality stitching with no residue build up or gummy needles. Ideal for hard to hoop items such as bulky towels, backpacks, collars, napkin corners, or socks. Also use for fabrics that can be damaged by the hooping process.

Water Soluble Topping

Completely water soluble and provides fantastic stability on the surface of your fabric by keeping your stitches elevated. Use on high pile fabrics such as fleece, terry and towels, textured fabrics such as corduroy, seer sucker, and velvet, on knits and lycra/spandex. Use to shield some fabrics from hoop burn.

Wet 'N' Gone Fusible®

Use on sheer fabrics such as organdy, organza, lame, sheer silks and more to establish a solid type fabric that is easier to hoop and embroider.

Wet 'N' Gone Tacky®

Use to embroider delicate designs on hard to hoop items such as the corners of handkerchiefs, silk blouse collars and more.

Wet 'N' Stick®

This remarkable stabilizer is coated with a water activated, silicone based adhesive. It is an alternative to pressure sensitive "sticky" paper products and/or messy spray adhesives. Perfect for bulky items such as towels, robes and blankets.

Heirloom

Heat 'N' Gone Topping Stabilizer®

Use this clear, 100% heat removable film as a topping or stabilizer on all fabrics that can withstand an iron temperature of 260° - 300° F (120°-140° C). Great when giving a gift and you need instant stabilizer removal or when your fabric cannot withstand moisture.

Wet 'N' Gone Fusible®

Use on sheer fabrics such as organdy, organza, lame, sheer silks and more to establish a solid type fabric that is easier to hoop and embroider.

Stitch 'N' Wash® Fusible & Non-Fusible

This 1.5 oz tear away stabilizer is ideal for airy, open work type embroidery designs on light cottons and linen.

Quilting

Appli-Kay Wonder®

Turn your embroideries into appliques or patches with this unique, pressure sensitive, fusible web. It may also be used to create traditional appliques for quilt squares, children's garments, tote bags, etc.

Heat 'N' Sta Fleece® and

Heat 'N' Sta Fleece Light®

Add dimension to your quilting projects. Create soft home dec items such as placemats, table runners and crib quilts. The uses are unlimited and because it is fusible, stitching can be as random as you desire!

Heat 'N' Sta® Tearaway

This tearaway stabilizer has a light fusible coating and was developed for embroidery on light weight cotton, shirt weight denim, linen and other woven fabrics that tend to distort or stretch when they are hooped or when the embroidery is forming.

Stitch 'N' Wash®

This 1.5 oz tear away stabilizer is ideal for airy, open work type embroidery designs on light cottons and linen.

Wet 'N' Gone Tacky®

Use to embroider delicate designs on hard to hoop items such as the corners of handkerchiefs, silk blouse collars and more.

Embroidery On Knits

No Show Nylon Mesh Fusible & Non-Fusible

This product will not shadow through on light colored fabrics such as knits. Its softness makes it ideal for children's clothing and baby garments. There is no need for basting or messy spray adhesives which leave a residue on the needle and machine when using this product.

Cutaway Medium Fusible & Non-Fusible

Very soft yet solid 2.0 oz stabilizer that will support medium to heavy stitch count designs. It is ideal for fabrics that are considered un-stable; fabrics such as fleece, t-shirts, sweatshirts, polo knit, etc.

Specialty Projects

Appli-Kay Wonder®

Turn your embroideries into appliques or patches with this unique, pressure sensitive, fusible web. It may also be used to create traditional appliques for quilt squares, children's garments, tote bags, etc.

No Show Nylon Mesh

This product will not shadow through on light colored fabrics such as knits. Its softness makes it ideal for children's clothing and baby garments.

Stitch 'N' Shape®

Use for adding shape, form and/or dimension to tote bags, placemats, fabric bowls/boxes, hat brims, ornaments, paper dolls and more. This remarkable product will hold its shape after it is inserted between two layers of fabric. You can stitch or embroider directly through it.

Template Tearaway®

Gives you the visual help you need to make your hooping experience much easier. The 8.5" x 11" sheets are ready to print and work on almost all types of printers and copiers.

Water-Soluble Topping

Completely water soluble and provides fantastic stability on the surface of your fabric by keeping your stitches elevated. Use on high pile fabrics such as fleece, terry and towels, textured fabrics such as corduroy, seer sucker, and velvet, on knits and lycra/spandex.

Wet 'N' Gone®

Fibrous water soluble stabilizer, does a superior job of supporting dense embroidery designs. Embroider most free standing lace with just one layer!

Specialty Fabrics

Dream Weave® Fusible

Fusing this product to the back of fabrics such as silk, satin, lame or chamois, Swiss Batiste, top quality quilt cottons and linen, Lycra or spandex, helps to protect the fabric from shredding by giving it more body yet doesn't change the face or drape of the fabric.

Heat 'N' Gone Topping Stabilizer®

Use this clear, 100% heat removable film as a topping or stabilizer on all fabrics that can withstand an iron temperature of 260° - 300° F (120°-140° C). Great when you need instant stabilizer removal or when your fabric cannot withstand moisture.

Wet 'N' Gone Fusible®

Use on sheer fabrics such as organdy, organza, lame, sheer silks and more to establish a solid type fabric that is easier to hoop and embroider.

Water-Soluble Topping

Completely water soluble and provides fantastic stability on the surface of your fabric by keeping your stitches elevated. Use on high pile fabrics such as corduroy, seer sucker, and velvet, on knits and lycra/spandex.
